MALTESE CROSS TIRES

SERVICE RECORD

Non-Skid Tread

The farmer, or any other motorist, should remember that the service record of a tire is one sure way to measure its excellence. Service records cannot be foretold; but experience with thousands of tires exactly the same weight, size and construction, gives a scientific basis for an estimate of service to be expected of the other thousands that follow. The Maltese Cross Trademark is the buyer's protection against faulty or careless workmanship or inferior materials. It is his guarantee that the tire will give him a service record to his satisfaction.

NISCO MANURE and STRAW Spreader

Straw Worth $8 a Ton—Don't Waste It

(All statements approved by Experiment Stations, Departments of Agriculture and progressive farmers).

Science and the experience of many up-to-date farmers prove that your straw stack contains tons of humus and much phosphorus, potash and nitrogen. At present prices, straw has a fertilizer value of $6.00 a ton—too valuable to burn or sell at a low figure.

In addition to that, it prevents the winter killing of wheat, mill blow or washing, conserves moisture and makes tough, sticky soil much more friable.

But you can't get these results by haphazard, wagon-full distribution. The straw must be well shredded, well distributed and put on evenly. The one sure way of getting all these results is to use the

NISCO ONE MAN Straw Spreading Attachment

You can put this attachment at small cost on your trusty Nisco—the original wide spreading spreader, and make it a perfect machine for both manure and straw—two machines in one. Spreads straw evenly 8 to 10 feet wide.

The Nisco has always been the bellwether of spreaders. It is always in the lead with new improvements and is built for a life-time of service. "Not a cent for repairs" is the statement of thousands of farmers who have used the Nisco for years.

See your Nisco dealer and have him show you the advantages of both the Nisco and the straw attachment. Don't wait for him to call on you as he is short of help now. Insist on the Nisco. Don't take some other machine or you will regret it later on. Ask the dealer or write us for illustrated circular and book on manure. Act now and be prepared for the spring drive of 1919.

Is Your Thresherman A Grain Saver?

He Is If He Uses The Grain-Saving Stacker

This is the most notable advance made in modern threshing. A device in the hopper returns to the separator the grain that would otherwise go to the stack. Users write us that the improvement saves *one to three per cent more grain.* Figure what that means to you.

Get the facts from any of the makers of North America's standard threshing machines listed below. Among these are the builders of the leading tractors and farm implements. All of them are prepared to supply threshing machines equipped with this Grain-Saving Stacker. *Write to any of these for information.*

View looking into hopper showing grain top-mast stacker fan; also engine running from beneath tray for returning the saved grain to separator.

Mileage
—at cut prices

SEED may, or may not, be a bargain at cut prices. It depends on the crop it produces.

Tires may be dear at cut prices. It depends on the mileage they render.

So we do not offer you Goodyear Tires on a basis of tire prices. We offer them on a basis of mileage cost. And when you have finally obtained the last mile from a Goodyear Tire, you realize at just how low a cost mileage can be bought.

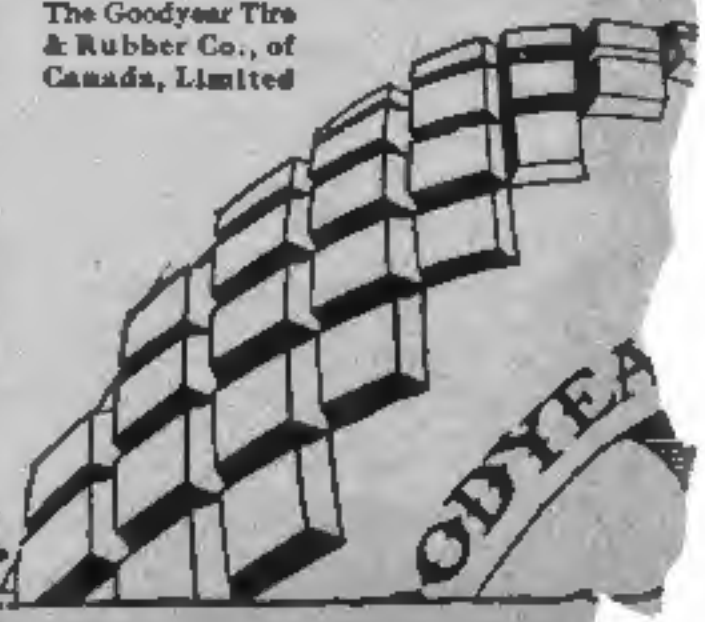

With the giant resources at our command we could probably produce a tire at a little lower price than anyone else. But every passing year more firmly convinces us that better tires, efficiently produced and marketed, will give the greatest value.

Apparently motorists have agreed with us, for they buy more Goodyear Tires than any other brand.

Surely you, too, will not allow a slight difference in first cost to stand in the way of lowering operating cost for your car, any more than you would allow the price of seed to ruin your crop.

See the Goodyear Service Station Dealer in town. He is selling mileage at cut prices.

GOODYEAR
MADE IN CANADA

THE WINNIPEG STRIKE

A Statement from the Citizens of Winnipeg to the Citizens of the West

is being written, the sympathetic strike in Wi
eg is now in its fifth week.

You have been deprived of a market, cut off
equate communication, your goods have not
nd the business of every citizen in Western
directly suffering in some way.

nderlying
ation

revealed in all of its hid-
ousness by this strike, is so grave that the citizens of Winnipeg through their Citizen's Committee of One
nd, feel it their duty to directly acquaint the citi-
f the West with the facts, warn you of the projected
ution aimed to overthrow constitutional government
Canada, and to appeal for your united support as
adian at a critical time.

On May 15, a general sympathetic strike was proclaimed in Winnipeg by an organization called the Central Strike Committee. Nearly 30,000 men and women went on strike. The ostensible reason—the excuse—was that a sympathetic strike must be called in support of the employees of three iron foundries, two of whom had not agreed with their men as to working conditions.

In addition to employees of all manner and kind of private business institutions, factories, warehouses, stores and shops; employees of the following public and quasi-public utilities and essential industries were pulled out by order of the Strike Committee:—

Firemen.
High-pressure Water Works' Employees.
Electric Light and Power Operators.
Street Cleaners, Scavengers, Etc.
Electric Railway Employees.
Postal Workers.
Building Engineers, Caretakers, and Elevator Operators.
Freight Handlers.
All Express Company Employees.
Truck Drivers, Carters and Delivery Stable.
Telegraph Operators.
Telephone Operators.
All Creamery and Milk Handling Employees.
Storage Plant Employees.
All Butchers and Packing House Employees.
All Millers and Bakers.

The Police and Waterworks' employees went technically on strike, but remained at their posts for the time being. "By Permission of the Strike Committee," with water pressure reduced to less than normal.

On the third day of the strike, by calling out the pressmen, the Strike Committee also suppressed the daily newspapers, and all other regular publications, including the paper you are now reading, save and excepting only the strikers' organ, the Western Labor News.

THIS strike placed in immediate jeopardy the very existence of the city, and the lives of its citizens. The Citizens Committee of One Thousand was thereupon organized for the sole original purpose of maintaining law and order, and assisting in the operation of the essential, vital utilities of the city.

A Volunteer Fire Brigade was organized.

A Motor Transport Fleet of one thousand automobiles was created.

Volunteer operators manned the telephone exchanges.

Citizens recruited the militia regiments to full strength.

Volunteer operators were supplied for the high-pressure water station, for the light and power operation.

A Citizen Patrol was organized to guard the 350 fire alarm stations, patrol property, and as a means of communication in case of a general alarm.

The restaurants, hotels, and many stores being closed, the Committee had to take steps to feed its volunteer workers, which was done.

As time passed postal service was gradually re-established by the organization of a partially new personnel. Gradually, most of the firemen returned to work and the services of the Volunteer Fire Brigade were to a large extent dispensed with.

The Police Situation

The most serious situation then developed with the police. The police had been called out with all other unions on the morning the strike began, but the policemen had remained on duty, although notice that the police were included in the strike had been duly given. It was openly claimed at the Labor Temple that the policemen were remaining on duty "By Permission of the Strike Committee." Later, the Police Commission issued an ultimatum to the policemen that they must either sign an individual pledge, attesting their loyalty to the city, or be dismissed. Considerable negotiation ensued and the date of the expiry of this ultimatum was twice extended at the request of the policemen, but finally thy were discharged as a body, and the volunteer police, who had been recruited in anticipation of this event, took over the policing of the city.

Victoria Cross Hero Mobbed

On Tuesday, June 10th, a serious riot occurred, many people were injured, and Sergt. Fred Coppins, V.C., one of the volunteer policemen, was dragged from his horse by a group of alien enemies and seriously injured. On that day the Chief of Police was discharged and the former deputy chief was made Chief, and the re-organization of the police force more vigorously proceeded with. That is the situation as it stands in Winnipeg as this is being written, June 14th.

WINNIPEG

A WORD TO THE WISE

The editors hope you enjoy reading The Guide. This year will see many important improvements made. We can promise our old subscribers many new, unusual and interesting features, a constant bettering of our service.

During the next few years Canada must solve the trying problems that will have resulted from the great war. The equitable solution of the reconstruction difficulties will determine the status of western agriculture—as to whether our prairies will be dotted with prosperous farms or the industry stifled by placing upon it an unequal portion of the vast burden of debt that has been created. Every farmer should keep posted—The Guide should be a weekly visitor in every farm home during the period.

Back numbers of The Guide cannot be supplied. Send in your renewal promptly to avoid missing a single issue.

The yellow address label on The Guide shows to what date your subscription is paid. No other receipt is issued.

Remittance should be made direct to The Guide, either by registered letter, postal note, postal, bank, or express money order.

THE GRAIN GROWERS' GUIDE

"Equal Rights to All and Special Privileges to None."

A Weekly Journal for Progressive Farmers.

The Guide is absolutely owned and controlled by the organized farmers — entirely independent and not one dollar of political, capitalistic, or special interest money is invested in it.

Published under the auspices and employed as the official organ of the Manitoba Grain Growers' Association, the Saskatchewan Grain Growers' Association and the United Farmers of Alberta.

GEORGE F. CHIPMAN, Editor and Manager.

Associate Editors: W. J. HEALY, R. D. COLQUETTE, JOHN W. WARD, B. A. LLOYD and MARY P. McCALLUM.

Advertising on the publishers through, unless, under, the supervision of second-class mail matter. Published weekly at 290 Vaughan St., Winnipeg, Man.

Vol. XII — June 25, 1919. — No. 26.

SUBSCRIPTION and ADVERTISING

Published every Wednesday. Subscription in the British Empire, $1.50 per year, except Winnipeg city, which is $2.00 per year. Foreign and United States subscription $2.50 per year. Single copies, 5 cents.

ADVERTISING RATES

Commercial Display: 30c., 35c. and 40c. agate line. Livestock Display: 25c. per agate line. Classified: 7c. per word per insertion.

No discounts for time or space on any class of advertising. All changes of copy and all matter must reach us eight days in advance of date of publication to insure insertion. Reading matter advertisements are marked "Advertisement." No advertisement of patent medicines, liquor, mining stock or extravagantly-worded real estate, will be accepted. We believe, through careful censorship, that every advertisement in The Guide is signed by trustworthy persons. We will be glad to act as a favor if any of our readers will advise us promptly should they have any reason to doubt the reliability of any person or firm who advertises in The Guide.

66

The political conventions being held in Alberta and Saskatchewan are being crowned with success beyond the expectations of the most enthusiastic supporters of political action. Two members of The Guide editorial staff have been attending the conventions, one in Alberta, and the other in Saskatchewan. Practically every convention is being covered and where it is impossible to attend one, special arrangements have been made for getting a first-hand report for The Guide readers. In this issue, reports of the conventions at Qu'Appelle, Assiniboia, Weyburn, Moose Jaw, Maple Creek and Swift Current, in Saskatchewan; and Macleod, Lethbridge, Bow River, East and West Calgary, Red Deer and Victoria, in Alberta, are published. The regular feature articles have been dropped for the week to give these important reports right-of-way. Full reports of the balance of the conventions, which include eight in Saskatchewan and four in Alberta, remain to be published. As many as arrive in time will appear in the next issue.

This week's Guide is not as fully illustrated as usual. In the big Winnipeg strike the engraving business was tied up in common with most other lines of enterprise in the city. This made it impossible to secure cuts for illustration purposes. However, the engravers have returned to work, and by next week The Guide will resume its usual appearance.

The midsummer number of The Guide is always one of the best specials published during the year. Last year it took the form of anniversary number, celebrating the tenth birthday of the organized farmers' official organ. This year it will take the form of a political campaign number. It will contain a long list of articles on the economic and political questions in which organized farmers are interesting themselves, and will prove to be a handbook of valuable information on the political and social questions.

The first sample of wheat heading out, to be received by The Guide, this season, arrived last Saturday. It was grown by W. C. Gillingham, Stephenfield, Man., and is from Red Bobs seed secured from The Guide last spring. The wheat was sown on April 18, and the sample sent, pulled on June 18. It was two feet eight inches high. The wheat shows all the Red Bobs characteristics including that of earliness, for which it is noted. Mr. Gillingham has to be congratulated on his success in sending in the first wheat in head for the season.

The Portage plowing match, which is the biggest event of its kind in Canada, eclipsed all previous records this year. The feature of this event is the tractor plowing match judged entirely on the quality of the plowing done. Over 30 contestants were entered in the tractor class. A full report of the plowing match appears in this issue. Unfortunately, the strike has made it impossible to secure illustrations from photographs taken with The Guide camera at this match, but these illustrations will appear in next week's Guide.

An Open Letter to Sir John William, written by a reader of his smooth and fluent articles appears on page 24 of this issue. After reading Sir John's last letter in The Guide the writer analyses the effect of that letter on himself. He answers in an interesting way. Resenting that the farmers are called Bolsheviks he closes with the recommendation that Sir John read carefully the Farmers' Platform.

Canada's Delegates to Europe, the fourth in the series, written by Norman Lambert, secretary of the Canadian Council of Agriculture, is given on page 22. In this article labor's part in the Peace conference is given, and also the demands that are being made in England by labor. This completes the series.

Canning Beans is the subject of a timely article by the Country Cook on page 21 of this week's Guide. The different kinds of canners now in vogue are contrasted with the old-fashioned open-kettle preserving. At a later date the canning of stone fruits will be dealt with.

The story of the strike in Winnipeg was given up to date in the last issue. A further news item of this prolonged strike appears on page 22.

TIMKEN TAPER

Dotted lines show how the inside of the "cup" of a Timken Bearing is tapered to fit over the tapered rollers.

Two Ways Out

When heavy trucking churns up the mud and cuts ruts deeper and deeper—

When mile after mile of sand holds back the wheels—

When rain-cut hilly roads and washed-out culverts call for careful driving—

For such ills as these, there is only one cure.

That's the remedy that begins with plow and scraper and ends with a hard-surface, well drained highway. Therefore, get back of the Good Roads movement and push it for all you are worth.

But there's a preventive against bad road DELAY that is written in the specifications of the trucks, and reads: "Reliability," one of the essentials of which is the selection of bearings that are capable of out-lasting the truck on which they serve.

Many builders have found the remedy in Timken Tapered Bearings, to which there is practically no "wear-out" except by abuse or accident. After a Timken Bearing has been slightly loosened by thousands of miles of wear, a part turn of the adjusting nut or removal of a shim puts all parts back just as when new.

As for Timken Taper—it always stays the same, ready to take end thrust and downward load—to keep gears up to their work—to stand guard over transmission and differential gears—ready to resist the constant heavy push of worm or pinion—ready to add at every point to truck life as well as efficiency.

There's more about these bearings in the booklet, "How Can I Tell." A copy will be sent to you on request.

Canton, Ohio

LOUDEN

You can depend on a full day's work

Louden Carry-all Carrier, with double tracks, roller bearing rope wheel, with rope lock—guaranteed capacity 2,000 pounds. Lightest draft carrier made.

Carry-all slings guaranteed at nearly 2,000 pounds; safe simple and efficient centre trip.

More hay or grain in the mows.

Louden Tools as used in Sweden. Give satisfaction the world over.

HANDLE tremendous loads rapidly—are simple and strong—efficient in unskilled hands—free from complicated trouble-making parts—no kinking ropes—no delays.

It makes no difference what the crop is—Timothy—prairie wool—clover—alfalfa—peavine—wheat sheaves—oat sheaves—all loose grains—loose straw—handled perfectly and safely.

Every Louden Hay Tool is guaranteed to be quality built—to work easily, continuously, safely and efficiently—to fulfil every claim we make for it—and more.

Louden equipment is a profit-making asset and not an expense. Send us the length of your barn—whether you unload from the end or from centre drive, and width space between your rafters.

Your local dealer will gladly quote you on Louden Equipment, or we will direct. You will be surprised to know how little really high-grade equipment costs.

If you are building or remodelling, our 112-page barn plan book (not a catalogue) will save you worry, time and money. Write for it, also our large illustrated catalogues, giving full descriptions. We mail them free.

Reserve Power Steady Threshing

The little, light, fast running tractors may be all right for plowing but they will not do for threshing. To run a thresher you want a power plant with a heavy reserve power. Power that not only runs the thresher when conditions are ideal, but that does not stall when bothered with wet bundles or over feeding. You get the right power for threshing when you get the

Nichols-Shepard Oil-Gas Tractor

It is designed as a power plant for threshing. It works like a steam engine when attached to the thresher.

It has two cylinders with a strong main shaft and a heavy fly wheel which stores the power to pull through those unexpected overloads. It has a strong, sturdy frame with enough weight to hold it in place. It burns kerosene and distillate and is as economical as a gas engine can be made.

It is also a good power plant for plowing and other heavy farm work.

WHAT IT ALL MEANS

Winnipeg Citizens Committee Asks Western Citizens to Form Country-wide Organization

THE Citizens Committee, as we have shown, was primarily organized to protect life and property, and afford the essentials of water, food, milk and bread to the people. As it became apparent to the Committee that the strike was not merely a dispute between employers and employees, but a deliberate attempt to raise the head of Bolshevism in Winnipeg and place the city under the administration of the Soviet Government, the efforts of this committee were enlarged and expanded to cope with the situation.

At the Calgary Labor Convention, in March, these agitators showed their hands clearly and plainly, sending greetings to the Soviet Government in Russia, and declared flatly their intention of introducing Bolshevist Government in Canada, and called on the workers to aid them.

Bolshevik Plot

Evidence has come to this Committee which satisfies us in the belief that this and other strikes throughout Canada are being engineered by a group of anarchist and socialistic agitators for the purpose of destroying the constitutional government of Canada and introducing Bolshevist Government therefor.

The Citizens' Committee of One Thousand believe that even behind these strike leaders there is yet a more sinister group of secret agents, who, during the war, were the agents of German sedition in Canada and the United States. Apparently, the strike in Winnipeg is but one of a series of similar strikes which these men hope to foment in various sections of Canada during the present summer and autumn.

Over Half of Metal Workers Aliens

These things being true, you will ask how it was possible for Canadian Trade Unionists to follow such leadership. You must remember that the unions with large membership were increased several hundred per cent. in membership during the war. This increase was made up almost entirely of foreigners. It has been stated that over half of the members of the Metal Workers Union, in Winnipeg, who started the present strike are of alien nationality. These men gained the ascendency in the unions during the war when so large a proportion of the loyal Canadian workmen were in France fighting their country's battles. Now that the returned soldier is coming home and looking for his job these aliens realize that they will be divested of their present employment in favor of returned soldiers, unless through their union affiliations they can hold a club at the head of the employers and maintain their position.

Loyal Workmen Misled

Moreover, of the 30,000 men and women in Winnipeg who were called out in this strike, over 90 per cent. had no quarrel with their employers, had no grievance, and did not want to strike. Strike votes were called peremptorily, and Union after Union was declared as voting for strike when but a few of the others had voted at all. In our opinion many of the Unions went their leaders blindly and unwittingly.

FOOD SUPPLIES CUT

WE have absolute evidence that it is part of the organized effort behind these strikes that they should be incited during the present season for the deliberate purpose of tying up transportation and shutting off the market for farm produce. By this means the transportation of farm machinery will be stopped, the movement of seed grain and other necessities of farm work would be curtailed, and the storage and sale of butter, eggs, livestock, and all other food produce would be stopped. This action, just at the season when the movement of milk, eggs, meat and food products from the farms is at its height, when the storage warehouses are being filled, would thus increase the high cost of living and make the situation more and more intolerable.

The Dastardly Plot

It was the plan to continue these strikes, bringing on the biggest and most far-reaching in the fall, for the direct purpose of tying up the movement of wheat after harvest, and of forcing the situation to a climax when the payment of post-war gratuities and deferred pay to returned soldiers would have ceased. Thus a situation would be created where hungry, desperate men would be ripe for any trouble, and in the minds of these leaders a social revolution could be carried out at a stroke, setting up their Russian Soviet form of Government in the place of the British constitution.

WHAT ARE WE GOING TO DO ABOUT IT?

Winnipeg is now in the grip of the strike for the fifth week. The citizens of this city, thoroughly aroused, are prepared to fight it out if it takes all summer. Our purpose in publishing this statement is to inform and arouse you to the crucial state of affairs that is upon us. Only through the prompt and energetic action of the citizenship of Canada can the serpent of Bolshevism be thrown from our midst.

F. B. Stacey, M.P. for Westminster, B.C., voiced the firm conviction of the Citizens of Winnipeg when he stated in Parliament, on June 12:—

Union Jack or Red Rag

"The one great thought in the West is whether the Union Jack shall float over Canadian cities or the Red Flag of Revolution."

In the opinion of the Citizens Committee of One Thousand in Winnipeg similar committees should be formed in every city and rural community in Western Canada and a sustained, vigorous and firm campaign of education carried on until the whole country realizes the danger it faces and forces out the skulking revolutionist.

We urge the representatives of every Citizens' organization or local committee formed, to write at once to us, so that an organized, systematic association of Loyal Citizens may be created for our mutual safety, the preservation of law and order, justice and constitutional government.

Citizens Committee of One Thousand

WINNIPEG

The Grain Growers' Guide

Winnipeg, Wednesday, June 25, 1919

Four Issues Lost

A number of letters have been received from Guide subscribers in the past week, complaining because they have not been receiving the paper for some weeks back. Some subscribers have taken The Guide very severely to task for not forwarding the paper to them as usual. The facts are as stated last week. When the big general strike was called in Winnipeg on May 15, the issue of The Guide of May 21 was nearly completed.

The Guide is printed in sections, and most of the sections were already on the press. From May 15 until June 12, it was impossible for The Guide to print any paper. But on that day a number of pressmen and bindery workers returned to work in The Guide printing plant. The issue of May 21 was therefore completed and the last section was brought up to date, including the editorial page, the budget speech, Mr. Crerar's speech explaining his resignation, the story of the strike and the market page.

The issue of May 21, therefore, was really a combination, although dated May 21. This week's issue is dated June 25, and there will be no issues for the intervening dates. On account of the strike The Guide has lost four of its regular weekly issues, between May 21 and June 25. The strike has caused The Guide heavy financial loss and a serious interruption to its service to its readers. But it is hoped that the service can now be resumed regularly.

It should be explained that the pressmen in the daily newspaper offices returned to work long before the pressmen in what are known as the job-printing plants. This explains why the daily newspapers reached the country for a considerable time before it was possible to print The Guide.

The Budget Vote

On June 5, Sir Thomas White, minister of finance, delivered the budget speech in the house of commons. In this speech, Sir Thomas announced the tariff changes which the government had decided to make. A summary of the budget speech was published in last week's Guide. Aside from the removal of the five per cent. war tax on British imports and a partial removal of the seven-and-a-half per cent. war tax on imports from other countries, there were no important changes in the tariff. Practically the only changes in the direction of the Farmers' Platform was the reduction of five per cent. in the duty on some lines of agricultural implements, a reduction of two-and-a-half per cent. in the duty on other agricultural implements, and a reduction of 2 cents per 100 pounds in the duty on cement. It was a protectionist budget, and could not be regarded as otherwise. The finance minister announced that an investigation into the tariff question would be made and a general revision of the tariff would take place at the next session of parliament. He did not say, however, whether the revision would be upwards or downwards.

The debate on the budget lasted from June 5 until the early morning hours of June 19, and a large number of members of the House of Commons expressed their views on the tariff proposals of the government. The first speaker following the finance minister was Andrew McMaster, liberal member from Brome, who condemned the budget because of its failure to reduce the tariff, and introduced the following amendment to the finance minister's motion:—

> The proposals of the finance minister are unsatisfactory. They offer no curb against extravagance. They utterly fail to take any adequate steps to relieve the present high cost of living. They give no definite promise of tariff revision downwards.
>
> That to relieve the present situation, the tariff should be so framed as to free the food of the people and the machinery used in the development of the natural resources of Canada, together with the raw material entering into the manufacture thereof.
>
> To take off or substantially reduce, as speedily as may be expedient and just to all interested, the duties upon all other necessaries of life.
>
> Also, the reciprocal offer of trade with the United States should be accepted, and a general downward revision of the tariff undertaken forthwith in conformity with the principle herein enunciated.

It will be remembered that Mr. McMaster brought a tariff resolution before the house some weeks ago, before the government proposals were announced. It was stated at that time, by western members of the house, that they did not consider that to be the proper time to bring a tariff resolution before the house. They preferred to wait until the government announced its tariff proposals, and therefore, most of them voted against Mr. McMaster's first tariff resolution.

After the budget speech was brought before the house it is well known that some of the western members proposed to bring in an amendment somewhat along the lines of the Farmers' Platform. Mr. McMaster was the first speaker, however, and brought in the amendment given above. According to the peculiar rules of the House of Commons, no further amendments could be brought in, and the members of the house were, therefore, compelled to vote on the amendment presented by Mr. McMaster. It was the only opportunity afforded for those to vote on a resolution favoring reduction of the tariff. It was the only opportunity afforded by which a member of the house could show the government that he was in earnest in demanding tariff reduction in order to afford relief from the present high cost of living and high cost of production.

On another page of this issue, we publish a letter from our Ottawa correspondent, giving a brief summary of the views expressed by the members from the prairie provinces upon the budget and the tariff proposals of the government; also a record of the vote which they cast. It is upon the views expressed and the votes cast that the electors of the prairie provinces will judge the conduct of their members in the house.

The members from the prairie provinces who voted in favor of the McMaster resolution, demanding tariff reduction, were as follows: Hon. T. A. Crerar, Marquette; Dr. Michael Clark, Red Deer; J. A. Maharg, Maple Creek; Andrew Knox, Prince Albert; F. L. Davis, Neepawa; Levi Thompson, Qu'Appelle; John F. Reid, Mackenzie; F. J. Johnston, Last Mountain; J. M. Douglas, Strathcona; J. P. Molloy, Provencher; W. A. Buchanan, Lethbridge; John A. Campbell, Nelson; Thomas MacNutt, Saltcoats; W. H. White, Victoria.

With two exceptions the liberal opposition in the house voted solidly for the McMaster amendment. The vote was 121 to 70 against the amendment, and the government had a majority of 51.

As soon as the amendment was thus disposed of the vote was then taken on the original motion, in support of the budget. Unionist members from the prairie provinces who voted against the budget were Hon T. A. Crerar, Dr. Michael Clark, Thomas MacNutt, Levi Thompson, F. J. Johnston, John F. Reid, John A. Campbell, F. L. Davis and W. A. Buchanan. On the budget vote the figures stand 120 for and 70 against, giving the government a majority of 50.

Probably no vote has been taken in the House of Commons in recent years which will create greater interest in the prairie provinces than the vote on the budget and the amendment last week. It is the privilege and the right of electors in every constituency to study carefully the record of their representative in the House of Commons, and to decide whether or not he truly represents the views of the electors of his constituency.

The Tariff and Profiteering

The textile industries of Canada have always been loud in their demands for tariff protection against foreign competition. Their plea has been that without high protection they would be forced to close their plants and throw thousands out of employment. The result has been that they have secured and maintained a high tariff wall against outside competition, and have piled up fabulous profits by charging extortionate prices in some cases for what they have produced.

Last week the Cost of Living Committee of the House of Commons, examined under oath the managers of two of the big textile industries. W. E. Patton, manager of the Patton Manufacturing Company, Sherbrooke, Quebec, manufacturers of tweed cloth, said that last year his firm made profits of 72.9 per cent. These profits, Mr. Patton explained, were due to war conditions, which prevented goods coming in from England, so that his firm was enabled to raise its prices and earn the huge dividends. Mr. Patton, when asked if he did not think it was due to the public to lower his prices, made the astounding reply: "Our mill wasn't built for the glory of God or anybody else. It was built for the benefit of the shareholders." This phrase undoubtedly represents the view of many protectionists and profiteering manufacturers, and will become a classic. It will stand along with old Commodore Vanderbilt's famous expression: "The public be damned."

The next witness called before the committee was Francis G. Daniels, manager of the Dominion Textile Company, which is generally referred to as "The Cotton Trust." After being put through a searching examination, Mr. Daniels was forced to admit that his firm last year made a profit of $1,550,888 on the common stock of the company, which cost only $500,000. In other words, this firm made a profit of more than 300 per cent. on its common stock. Mr. Daniels explained that this profit was due largely to the fact that they bought raw cotton at 22 cents per pound, and the market had gone up to 36 cents per pound. In making up the costs of their manufactured products they figured in the raw cotton at the higher price.

It is the cloth manufactured by these companies [illegible] is worn by the people of Canada. They have enjoyed tariff protection to the extent of 42½ per cent., and yet the finance minister and the protectionists tell us that our manufacturing industries would be closed down if the tariff protection was reduced. It is this kind of profiteering under the shelter of the protective tariff which is making the cost of living so high. It is this greed which is creating the general unrest throughout the country. These manufacturers took from 72 to 300 per cent. profit on their cloth. When it was made into clothing, the clothing manufacturer no doubt took at least 50 per cent. profit. The wholesaler took another 35 per cent. profit, and the retailer 30 per cent. profit. It all means that when the consumer buys a suit of clothes for $40 he is paying half of it out for profits which are large[illegible]

by means of the protective tariff. This extortion will continue as long as the protective tariff enables manufacturers to charge a higher price than they could charge if they had to face competition from foreign manufacturers. They are not operating their factories "for the glory of God or anybody else." They are after dividends and the protective tariff is a good dividend builder.

Deluding Himself

The old-time party politician is a survival from an era that is ended and done with. He is blind and deaf to the actualities of the new era, and does not realize that the system of which he formed part has passed away. He has his ear to the ground, and deludes himself into believing that presently he will hear the people getting into line with one or the other of the "grand old" parties, both of which have proved themselves lacking in fixed principles which their devotees could say they were voting for. In the next Dominion elections more Canadian citizens, men and women, than ever before, will insist on making sure of what they are voting for.

Protectionist Abuse

Out of 43 members elected to the House of Commons from the prairie provinces, only 14 could be found to vote in favor of the budget amendment demanding substantial reduction in the tariff. Because of this fact the eastern protectionist press, particularly the Montreal Gazette, declares that these 14 did not represent the western viewpoint, and that the people of the West are more truly represented by the other western members who voted for the budget brought down by Sir Thomas White. The Gazette is particularly vigorous in its criticism and abuse of Hon. T. A. Crerar and J. A. Maharg, two of the outstanding men in the grain growers' organizations, who demanded tariff reduction and who voted for the McMaster amendment.

The last general election in 1917 was conducted on the war issue, and for that reason the Dominion government and its supporters have the idea that western members have no authority to voice an opinion on other subjects. The Montreal Gazette and the eastern protectionists may derive some temporary satisfaction by abusing and misrepresenting the grain grower members, but there will be an election held in the course of time, and when that election is held the issue in the prairie provinces, at least, will be on the Farmers' Platform, and the voice of the West will be heard as it has never been heard before.

The Strike Situation

The general strike situation in Winnipeg has changed but little during the past week. It is estimated that probably 3,000 or 4,000 people have gone back to work, leaving still, somewhere about 30,000 on strike. All the public utilities are being operated, partially or completely, by volunteer workers, and by new hands who have been engaged. Milk, bread, and ice are being distributed by volunteer workers.

The dispute between the employees and the employers in the metal trades should be settled, as the employers have agreed to "collective bargaining" on the same basis as is in force with the "Big Six" railway organizations, the most powerful unions on the continent. But the Strike Committee has declined to accept this basis of "collective bargaining." Furthermore, the Strike Committee demands that all strikers be reinstated without prejudice, which is an absolute impossibility. The Dominion, provincial and city governments have engaged a large number of people to take the place of their striking employees and have declared that they will not discharge the new employees they have engaged.

The strike now is practically being conducted to force these three governments to recede from their position. But the attitude of the governments, and of the people generally, aside from the strikers, is most determined in favor of standing firm. Constituted authority has been openly defied in Winnipeg, and it must be upheld at all costs, or Canada will become a disorganized country, like Russia is today.

On Saturday, June 21, in defiance of all authority a parade was attempted on the main street in Winnipeg. The result was rioting and bloodshed, and a large number of casualties. The city police, the mounted police, and the military combined to quell the riot. Hundreds of arrests have been made.

How the strike will end, or when, no one can predict, but that law and order will be maintained is a certainty, and those who bid defiance and enter into open rebellion to constituted authority, can blame no one but themselves for the consequences. The evils from which Canada suffers cannot be cured by anarchy. Public opinion and the ballot box afford an opportunity for every citizen to express his views according to constitutional methods and that method must be adhered to.

Day by day, wealthy corporations and individuals are gathering up the tax free war bonds issued by the government. In another year or two we shall witness the spectacle of the possessors of huge incomes being absolutely free from taxation, while the burden of the country will be thrown that much heavier upon the shoulders of the poorer people.

Next week's issue of The Guide will be a Political Campaign Number, devoted to an elaboration of the planks in the Farmers' Platform. It will be one of the most valuable numbers The Guide ever issued, and will constitute a handbook on the political principles which are laid down in the Farmers' Platform.

Hart-Parr Running Full Time, Orders Booked Ahead. *Why?*

Farmers are buying the New Hart-Parr 30 tractor because power and fuel economy tests throughout the country have continually proved its high qualities.

The final test is when the tractor gets into the hands of the farmer—and owners of New Hart-Parr 30's are continually spreading the story of its satisfactory performance on the farm.

Hart-Parr Company entered the reconstruction period cleared by the high-speed campaign Army and Navy Ordnance work. That is to our war work the quality and workmanship of the Hart-Parr product is up to several pre-war standard.

Nineteen years ago Hart-Parr introduced the tractor industry. Many of our old 66's that plowed the prairies of the Northwest are working the same fields today. We still aim to lead the tractor industry.

SHORTHORNS AND CLYDESDALES

Do You Remember This?

Read again the resolution by which the Canadian Hail Underwriters' Association tried (and failed) to keep the Organized Farmers out of the insurance business:--

"That no member may appoint as its general or local agent any individual, partnership, company or association of any kind, or any official or representative thereof identified with any body or combination of organized farmers with the end in view of inducing or securing applications for hail insurance through permitting or offering, either directly or indirectly, benefits from the commission thereon."

Above resolution was passed at a meeting of the Canadian Hail Underwriters' Association, on December 15th, at Regina

Every storm cloud reminds you of the need of hail insurance. Act now! but when you act

REMEMBER THESE THINGS:

The entry of the Organized Farmers in the hail insurance business was opposed

The opposition failed. The farmers went on with their plans.

The Company which the Organized Farmers arranged to represent, THE CAR & GENERAL INSURANCE CORPORATION OF LONDON, ENGLAND, stood fast and stuck to its arrangements.

Mutual and Municipal hail insurance is good, but if you are offered a policy in another line company just ask the agent why the other Companies wanted to keep the Organized Farmers out of the insurance business

There is an agent in your district able to offer you a policy in The Car & General Insurance Corporation of London, England. He is the only agent working for the Organized Farmers. See him today and get your application in. Don't delay if you do not know him or cannot reach him today. Write tonight to the nearest office of the Company.

INSURANCE DEPARTMENT

UNITED GRAIN GROWERS SECURITIES LTD.

The Organized Farmer in Business

CALGARY SASKATOON WINNIPEG

THE mails from Winnipeg were closed during part of the strike. The wires were silent

Not a farmer in the West was unaffected. Many actually suffered serious inconvenience or loss, while every one was in danger of such losses not yet realized

What are YOU going to do about it?

You see Labor in the cities organizing and refusing its wages by the millions in struggles for what it considers to be its rights.

You see financial, railway and manufacturing interests organizing and spending their millions to protect their privileges.

What are YOU going to do about it?

If the Laborer will pay the heavy dues his Union needs, will the Farmer pay the cost of running his Association? If Labor will put a month of its time, and all it can earn in that time into a strike, will the Farmer take the time to attend a meeting?

If Labor will stand by its Association until the cost brings it almost to starvation, will the Farmer stand by his Association when he actually profits financially from it?

Capital, through Association, has had a great deal to do with the management of things in this country. Labor, by Association, is obtaining an influence that is steadily increasing. Is the Farmer content to leave things to them?

What are YOU going to do about it?

Only through Organization can the Farmer protect his own interests. Only through Organization can he prevent himself from being exploited. And only through Organization can he have an effective voice in the affairs of the country

Through his Organization there has already been proposed a solution of many of the problems that cause unrest today

That solution is the Farmers' Platform

What are YOU going to do about it?

Lubrication Very Important

Are you giving your Automobile, Stationary Engine, Tractor and other farm machines the proper lubrication attention? All of these must be correctly lubricated if they are to give you the kind and length of service that they should give.

Imperial Farm Lubricants are well known to Canadian farmers. If you are using an [illegible] lubricant—but it is possible that the way you use Imperial Lubricants can be improved. Note recommendations below. We have the right lubricant for each purpose and it is only by using the right one that results may be secured.

The Deeper Life

T

The date on the Film

In just a few years you will ask:

'This picture of John, was it made before or after the war? And this of little Mary taking her first toddling steps—how old was she then?

How those snap-shots, made on our trip to the Yellowstone, bring it all back to us, except the date,—*when did we go?*

Grandmother before the fireplace with her knitting, growing old gently and gracefully—how old was she? It is so annoying not to remember.

Time plays the mischief with memory—but with the *date on the film* you may laugh at his tricks. All folding Kodaks and folding Brownies are now *autographic* and, with autographic film, provide the means for dating and titling each negative as you make it. It is all done in a few seconds, is as simple as "pressing the button" and though it may not seem so at the moment, *a date is always worth while.*

And there is no extra charge for autographic film.

FLEET FOOT

brings City Styles to Country Homes

Fleet Foot Shoes enable women and girls on the farms to wear the same smart summer footwear as their sisters are wearing in the cities.

Fleet Foot Shoes are restful, comfortable, and carefully made for sturdy wear—and their low price enables you to have several pairs for the price of one pair of leather shoes.

There are also Fleet Foot Shoes for men and boys, for work and play, for every member of the family.

DOMINION RUBBER

Ask your dealer for Fleet Foot Shoes
The name is stamped on each pair.

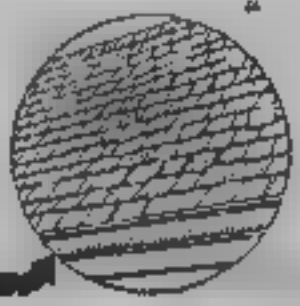

Which is Your Roof?

The one with well stained shingles, smart looking and weathertight—a credit to you and to the community, or, like the lower picture, warped and curled by wind and sun—innocent of stain and a prey to every mood of the weather?

Don't neglect the roof of your house—it's poor business. From the time the last shingle nail is driven one

Stephens' SHINGLE STAIN

and add years of service to the whole building.

Stephens' Shingle Stain is made of Creosote and preserving oils which saturate the wood and defies decay. Two long preserving oils, soluble colors to choose from. Ask your Stephens' dealer for an estimate.

Neōlin Soles are in stock

ōlin Soles—half-soles
d full soles—are nailed
sewn on all kinds of
oes by manufacturers,
air men, and at home.

Tested and Not Found Wanting

For three and one-half years Neōlin Soles have been tested and tried throughout the length and breadth of this continent. Millions of pairs have been subjected to the daily grind of work and play in city and country.

And Neōlin Soles have not been found wanting.

For every pair that was tried when Neōlin was unknown outside of the shoe trade, a hundred pairs are purchased now by people who *know* the good qualities of Neōlin Soles.

You cannot go into any gathering in America without passing people who are saving shoe costs, gaining foot-comfort, with Neōlin Soles.

On thousands of farms Neōlin Soles are making work easier, and shoe-bills less frequent. Soles which are light and flexible, and yet long-wearing. Comfortable soles, on Sunday shoes, and on work-shoes. *Damp-proof* soles, protecting against wet feet.

You can see them at your shoe-merchant's—a wide range of shoes with Neōlin Soles—shoes for Sunday and for field work, women's and children's shoes. Start now to make the saving which Neōlin Soles bring.

Neōlin Soles have been a great success. So they have imitators. But the methods and materials that make Neōlin Soles superior are known only to Goodyear. You can be sure of Neōlin Sole quality only when you see the trade-mark "Neōlin" on the bottom of the sole.

Final Telephone Efficiency

That is the kind that you get from a Kellogg phone. That operate on all lines, with any kind of equipment. Bell rings clearly, even with 40 telephones on one line.

COMPACT—Occupying minimum wall space. DURABLE—least maintenance cost. EFFICIENT—Always on the job—day or night in case of sickness, trouble or any of the many accidents that might happen to your household.

KELLOGG TELEPHONES

can be depended on as they are made by men who have worked over 21 years to make them the most effective instrument on the market.

The best engineering talent obtainable has constantly striven to make them possess the greatest talking efficiency. Today the Kellogg telephone is the most capable produced—its record in service is the surest indication of this claim.

Kellogg telephones will lower your maintenance to almost nothing.

The Kellogg phone is "built"—not just assembled. Each part is made with the utmost care, and of the best material and the whole is assembled by experts. Cabinets, for instance, are made in our own factory of heavy quarter-sawed oak, shaped, dovetailed, assembled and glued to last—and they do—thousands of Kellogg phones 15 and 20 years in service today.

You are insured against trouble when your equipment is Kellogg. We furnish everything to connect two people in telephone conversation. Booklets and prices furnished on request. Write us today.

BEAVER KEROSENE TRACTOR

The Drive that Pulls

SEVEN SPEED TRACTION TRANSMISSION

Three Plow Tractor

The Beaver—because of exceptional power—handles three plows with ease in the toughest prairie sod. The Waukesha motor, with a reserve of 50 per cent. surplus power over rating, is the most effective tractor engine built. A direct friction drive eliminates wasteful gears and delivers all the power for actual service. The seven speeds forward and reverse make operation a pleasure, and guarantee effective work. Only the actual power required for each second of operation is drawn from the motor. The transmission acts as an automatic regulator of fuel and oil.

Write Dept. "C" today for information you should have before purchasing any tractor

An Irrigated Farm

IN SUNNY SOUTHERN ALBERTA

FARM THAT EXPERIENCE WITH IRRIGATION

Lacey Sargeant, of Stanford, Alberta, irrigated 70 acres of wheat and oats. His irrigated wheat yielded 15 bushels an acre more than that which was not irrigated. His oats 30 bushels more.

W. Smith, broke 30 acres raw prairie land in the spring near Hanna, Alberta. This he seeded to wheat and irrigated. His crop averaged nearly 40 bushels to the acre.

T. S. Thomson, of Rockford, Alberta, had an average of 40 bushels an acre of No. 1 wheat from 40 acres of irrigated land. Part of his land irrigated earlier yielded more than 50 bushels an acre.

M. C. Nance, of Raymond, threshed 1,200 bushels No. 1 wheat from 30 acres of irrigated land, an average of more than 39 bushels to the acre.

F. J. Mack, who is farming 30 acres near Lethbridge, harvested 1,000 bushels of wheat, 250 bushels of oats, 6 tons of oat hay, 25 tons of potatoes and from an acre set aside for a garden sold $75 worth of vegetables besides growing sufficient for his own family's needs for the year.

G. B. Sauer, who settled at Dunmore, in 1917, on a quarter-section, harvested 1,856 bushels of wheat, 700 bushels of oats, and 150 bushels of potatoes. This crop also sold $1,300. In addition, he grew water-melons, cantaloupes, tomatoes, sweet corn in his garden.

C. A. Wildsmith, of Gem, harvested a crop of 55 bushels to the acre of oats which was cut cooked until June 5th.

is an Ideal Mixed Farming Proposition

The large crops of wheat, oats, barley, alfalfa and various other fodder crops obtainable every year enable a maximum number of cattle, sheep, hogs or poultry to be supported on these farms. Beets, potatoes, tomatoes, all kinds of vegetables and garden produce, including cantaloupes, citrons, pumpkins, squash, raspberries, strawberries, successfully grown. Land only $40 an acre, including water rights. Easy terms. One-tenth cash and 20 years to pay balance. $2,000 loan for buildings, fencing and well. A chance to become independent.

Like the teeth of a buzz saw!

YOU'VE stood in awe before a buzz saw and watched it literally tear its way through a piece of material. Being driven at such a terrific speed it produces results that are almost startling. But if you were to run the buzz saw at a much slower speed, and take some of the keenness off of the teeth, then you would have an action very similar to that of road bumps, ruts and rough places as they rack, strain and wear out your Ford Car or Ford One Ton Truck.

The thousands of sudden, heavy impacts, while not sufficient to cause instant breakage, yet cause great and unnecessary wear on all parts, particularly the power unit and the tires.

It has been proved by nearly a million Ford owners that by properly cushioning their machines against road shocks and vibrations with Hassler Shock Absorbers, that you save at least 30 per cent. of the ordinary tire and repair expense, and that your Ford's depreciation is decreased a like amount. You also obtain considerable increase in gasoline mileage, due to the smoother running. Hasslers prevent squeaks, rattles and deterioration, for the spiral, conical springs of chrome-vanadium steel compress on either upward or downward movements.

In addition to all of these savings you have such greatly-increased comfort that your Ford Car or Truck rides and drives as well as the highest-priced heavy models. It steers easily, holds the road, travels safely at high speed, and the general and good satisfaction you derive from its use is increased astonishingly by Hassler Shock Absorbers.

Hassler Shock Absorbers can be put on in a very few minutes, either by you or your garageman. There are two types, one for all Ford Passenger Cars, the other "Double or Twins" for the rear of the Ford One Ton Truck.

TEN-DAY TRIAL OFFER

Don't ride without Hasslers because someone tries to discourage you. They are a quality product—worth the price. The Hassler dealer in your vicinity will put them on for ten days' trial. Your money refunded if you say so. Write for name of dealer and Trial Book.

Shock Absorber
PATENTED

MADE IN CANADA

The conical springs set at the angle shown prevent sidesway and allow for the most resilient downward action. The springs compress on either upward or downward movements—do not stretch out of shape—do not allow motion to throw. Hasslers last as long as the Ford and make it last.

Improve the Quality —Then Increase the Quantity

SHEEP have made big returns during the last few years and will CONTINUE to give big returns if the maximum production at the minimum cost is obtained. To get maximum returns at minimum cost it is necessary to produce A1 lamb, mutton and wool.

Requirements for A1 Lamb and Wool

1. Use pure bred rams.
2. Castrate and dock the lambs.
3. Grow summer pasture crops.
4. Finish lambs before selling.
5. Keep fleeces free from chaff.
6. Tie fleeces with paper twine.
7. Keep tags and black wool separate.

To get the best market returns sell lambs, sheep and wool through the local or provincial co-operative associations.

A scrub ram
His greatest fault—he lived too long.

In a law court last year a judge gave the decision that each lamb out of a pure bred ewe by a pure bred ram was worth $26 more than if a scrub ram had sired it.

Have no fear of over-supplying the home market. In 1918, $42,000,000.00 worth of wool and its manufactures were imported into Canada.

In 1918, over 4,000,000 pounds of frozen Australasian lamb and mutton were consumed in Canada.

The Dominion of Canada Department of Agriculture, through the sheep and goat division, announces a new policy to demonstrate to every sheepraiser on his own farm the value of the PURE BRED RAM. Sheepraisers who have never used a pure bred sire and purchase one for their flocks this year will be given a premium of $5.00 annually for two years. Write the Chief, Sheep and Goat Division for further particulars.

A Directory of Breeders, Pamphlets on the production of A1 lambs and wool and all branches of sheep-raising will be sent free of charge to all who write the Chief, Sheep and Goat Division, Live Stock Branch, Ottawa. They are yours for the writing.
